

Help Save the Environment

We are proud to introduce WaterFence, a unique and innovative Rainwater Harvesting system! WaterFence allows you to offer homeowners a new "Water Sustainability" solution in the form of a fence! Hence serving two functions in one: rain water storage and fencing the property.

WaterFence takes up minimal yard space and gives homeowners the opportunity to store thousands of gallons of fresh clean rainwater each time it rains. Most houses have a fence, so why not use it to store water.

With climate change, rainwater becomes even more important for us to save. WaterFence enables individual contribution to sustainability, a greener lifestyle, and water conservation.

Storing runoff rainwater reduces pollution in streams and rivers, and overtaking our wastewater treatment plants hence reducing environmental impact.

WaterFence is manufactured from 100% recyclable materials.

WaterFence qualifies your building for LEED certification points.

21ST CENTURY RAINWATER HARVESTING IS HERE INTRODUCING WATERFENCE!

- Innovative, new fresh water storage system that utilizes roof rain runoff into an interconnected fence system that can store thousands of gallons of water giving you the possibility of water sustainability, even in severe drought situations.
- The WaterFence is a truly inspiring housing product designed to allow you to save money and protect our nation's valuable water supply through effective conservation.
- As the general population continues to grow we consume more and more of our fresh water supply, and currently, The World's fresh water supplies are strained beyond their capabilities. The WaterFence aims to fix this.
- A roof of 2000 Sq. feet, with just 1 inch of rain has 1260 gallons of runoff. Rainfall is guided from the roof thru screened gutters and to downspouts and then into WaterFence's interconnected fence sections. This way WaterFence can store Thousands of gallons of fresh water.
- UV treated and available in many colors, WaterFence serves as a robust Perimeter fence to your yard. You can attach many different looks to it like Redwood fencing, a rock wall design or just leave it as a Living Growing Fence by attaching your favorite flowers or vegetables, whatever you wish.

PROTECT YOUR HOME

- Serves as a fire barrier for the home.
- WaterFence can recirculate roof wetting system water to protect your home from impending fire.

GET WATER SECURITY & REDUCE WATER BILLS

- WaterFence is the solution for those looking to conserve water, and reduce dependence on municipal water.
- Substantial landscaping and gardening needs can be resolved as well as providing emergency water.
